Food Contact Statement

This is to declare that, the compositions of our products identified as:

GROUND CALCIUM CARBONATE **PRECIPITATED CALCIUM CARBONATE**

comply with the following regulatory requirements of U.S. Food and Drug Administration(FDA):

- 21 CFR 178.3297 Colorants for polymers

and can be safely used in non-acidic-food contact articles with loading up to 40wt%.

Note:

In the manufacturing of articles intended for use in contact with food, above products should be sufficiently integrated within the plastic materials and articles so as to preclude any significant migration into foodstuffs under normal conditions of use, as determined by an appropriate method.
